The Agricultural Epitomist

The basis for the major motion picture The Extraordinary Journey of the Fakir A charmingly exuberant comic debut, The Extraordinary Journey of the Fakir Who Got Trapped in an Ikea Wardrobe is the globetrotting story of a trickster from rural India and his adventure of a lifetime. When the fakir—a professional con artist—arrives in Paris, he has just one goal: to get to Ikea. Armed with only a counterfeit hundred-euro note in the pocket of his silk trousers, he is confident that he has all he needs to thrive. But his plan goes horribly awry when he hides inside a wardrobe at the iconic Swedish retailer—the first in a series of accidents that will send him on a whirlwind tour across Europe. Pursued across the continent by a swindled taxi driver dead set on revenge, our fakir soon finds unlikely friends—from movie stars to illegal immigrants—in even unlikelier places. And, much to his own surprise, his heart begins to open to those around him as he comes to understand the universal desire to seek a better life in an often dangerous world. Channeling the manic energy of the Marx Brothers and the biting social commentary of Candide,Romain Puértolas has crafted an unforgettable comic romp around Europe that is propelled by laughter, love, and, ultimately, redemption. (Meatballs not included but highly recommended.)

The Handbook of Interior Architecture and Design

This book is not a dictionary, though it tells you all you need know about everything from Authenticity to Zips. It's not an autobiography, though it does offer a revealing and highly personal inside view of contemporary culture. It's an essential tool kit for understanding the modern world. It's about what makes a Warhol a genuine fake; the creation of national identities; the mania to collect. It's also about the world seen from the rear view mirror of Grand Theft Auto V; digital ornament and why we value imperfection. It's about drinking a bruisingly dry martini in Adolf Loo's American bar in Vienna, and about Hitchcock's film sets. It's about fashion and technology, about politics and art.

The Handbook of Interior Architecture and Design offers a compelling collection of original essays that seek to examine the shifting role of interior architecture and interior design, and their importance and meaning within the contemporary world. Interior architecture and interior design are disciplines that span a complexity of ideas, ranging from human behaviour and anthropology to history and the technology of the future. Approaches to designing the interior are in a constant state of flux, reflecting and adapting to the changing systems of history, culture and politics. It is this process that allows interior design to be used as evidence for identifying patterns of consumption, gender, identity and social issues. The Handbook of Interior Architecture and Design provides a pioneering overview of the ideas and arrangements within the two disciplines that make them such important platforms from which to study the way humans interact with the space around them. Covering a wide range of thought and research, the book enables the reader to investigate fully the changing face of interior architecture and interior design, while offering questions about their future trajectory.

How to accommodate contemporary life in a historic house. This book does not repeat basic information that is readily available in many standard DIY books about carpentry, wiring, and plumbing. Rather, it shows how to adapt those DIY skills to the specialized needs of a historic house. Although there are other books about renovating old houses, this is the first that prioritizes the identification and preservation of the historic, character-defining features of a house as a starting point in the process. That is the purpose of this book: to describe and illustrate a best-practices approach for updating historic homes for modern life in ways that do not attempt to turn an old house into a new one. The book also suggests many ways to save money in the process, without settling for cheap or inappropriate solutions. Scott Hanson is a historic-building preservation professional and has 40 years' experience rehabilitating historic houses. He has illustrated this authoritative book with hundreds of step-by-step photos, illustrations, charts, and decision-making guides. Interspersed throughout are photo essays of 13 restored historic houses representing a range of periods and architectural styles: Italianate, Victorian, Queen Anne, Federal, Colonial, Colonial Revival, Greek Revival, Ranch, Adobe, Craftsman, Shingle, and Rustic. With interior and exterior photography by David Clough, these multi-page features show what can be achieved when a historic home is renovated with a desire to preserve or restore as much historic character as possible.

In Spent, editor Kerry Cohen opens the closet doors wide to tales of women's true relationships with shopping, from humorous stories of love/hate relationships with the mall to heartbreaking tales of overspending to fix relationships. With a contributor list that includes notable female writers like Emily Chenoweth, Ophira Eisenberg, Allison Amend, and Aryn Kyle, the essays each shine light on the particular impact shopping has on all of us. Whether they're cleaning out closets of loved ones, hiding a shoplifting habit, trying out extreme couponing, dividing up family possessions, or buying a brand-new car while in labor, the book's contributors vacillate between convincing themselves to spend and struggling not to. This illuminating anthology links the effects

shopping has on our emotions — whether it fills us with guilt, happiness, resentment, or doubt — our self-worth, and our relationships with parents, grandparents, lovers, children, and friends.

A home of one's own has always been a cornerstone of the American dream, fulfilling like nothing else the desire for comfort, financial security, independence, and with a little luck, even a touch of distinctive character, or even beauty. But what we have come to regard as almost a national birthright has recently begun to elude more and more prospective homebuyers. Where housing is concerned, affordable and well-crafted rarely exist together. Or do they? For years, founding editor-in-chief of Dwell magazine and noted architecture and design critic Karrie Jacobs had been confronting this question both professionally and personally. Finally, she decided to see for herself whether it was possible to build the home of her own dreams for a reasonable sum. The Perfect \$100,000 House is the story of that quest, a search that takes her from a two-week crash course in housebuilding in Vermont to a road trip of some 14,000 miles. In the course of her journey Jacobs encounters a group of intrepid and visionary architects and builders working to revolutionize the way Americans think about homes, about construction techniques, and about the very idea of community. By her trip's end Jacobs, has not only had a practical and sobering education in the economics, aesthetics, and politics of homebuilding, but has been spurred to challenge her own deeply held beliefs about what constitutes an ideal home. The Perfect \$100,000 House is a compelling and inspiring demonstration that we can live in homes that are sensible, modest, and beautiful.

Experiential marketing - or memorable customer experiences - is proving a popular tool amongst businesses seeking to make an impact in a competitive world. Yet the scramble to achieve a presence among experience providers has led many companies to design and implement experiential marketing without integrating it with their overall marketing strategy. These companies often end up dissatisfying their customers rather than delighting them. This research anthology investigates different angles of experiential marketing. The 16 chapters are organised in six sections. The first section considers whether memorable customer experiences result from the use of traditional marketing practices, perhaps implemented more effectively than previously, or require entirely new

practices with new foundations that turn companies into experience providers. Section two details ways businesses seek to build brands through putting experiential marketing into practice, while section three asks whether there are general principles that can be applied to the design of customer experiences which ensure successful outcomes whatever market you may operate in. Section four examines how companies manage their customer experiences once they have made the strategic decision to provide them, and section five looks at methods available to evaluate the success of these customer experiences. 'Experiential marketing changes everything!' claim the management gurus, but is it really so significant that not joining this race is dangerous? The last section of the book offers a much needed critique of experiential marketing.
